A bill has passed the Assembly, creating the office of Vice-President of the Park Board and attaching to the position a salary of five thousand dollars a year.

Heretofore the office of Park Commissioners has been an unsalaried one, with the exception of the President, who for some years past has received five thousand dollars a year for his services. A Park Commissionership has been considered a position of honor and has been held in former days by some of our most prominent citizens.

If the Vice-President is now to be paid a salary, there can be no reason why all the Commissioners should not be placed on the same footing. Indeed, it is said that the new law, if enacted, will be equivalent to giving each Commissioners \$2,500 a year, as it is arranged that the positions of President and Vice-President will be held by each in turn for one year.

Probably there is no good reason why the Park Commissioners abould not part the position of President and Vice-President will be held by each in turn for one year.
